Suggested Topics for Discussion

The 14 September demarche by Ambassador Unger to Premier Chiang, which warned the GRC of US displeasure over nuclear fuel reprocessing activities on the island, has once again sensitized the GRC to USG concerns over nuclear proliferation. CCK assured the Ambassador that the GRC will cease its reprocessing activities. Since that meeting, we have received intelligence reports, particularly from Europe, which suggest that the GRC may be continuing their fuel reprocessing program despite CCK's assurances. The Department of State has agreed that before it will take any action based on intelligence reports that it will consult with us in order to be certain that a violation of the Non-proliferation Treaty has occurred.

Ambassador Unger has expressed an interest in discussing the question of leadership succession in Taiwan. The problem of who is likely to succeed Premier Chiang Ching-kuo continues to vex the U.S. Mission. There are no clearly defined candidates for this position and various theories have currency at this time. General Wang Sheng, Director of the Ministry of National Defense, General Political Warfare Department, is perhaps the most aggressive member of possible candidates; but there certainly has been no identified grooming of a successor by CCK.
